

# The "TITAN" COW – Your Best Solution for Special Events, Disaster Recovery, and Temp-to-Perm

The TITAN COW is Maverick Technologies Inc.'s largest and most rugged COW –the *King of the Road*. It will lift the largest antennas and carry its own coax and other materials. It's just one of our many innovative new designs that won't bust your budget!

The Maverick Titan COW- rugged, long-lasting, and protective of your equipment

- Fifth wheel style coupling enables transportation by any standard road tractor
- Air ride suspension cushioning and anti-lock brake systems
- Galvanized finish outlasts paint & rust
- Two 3-ton air conditioners for redundant cooling
- Internal/external grounding for safety
- Steel hydraulic mast will lift up to 2500 lbs.

Titan COW – provides a safer work environment:

- Fifth wheel style coupling provides the most stable platform
- Proprietary articulated outriggers eliminate need for ballast blocks and provide increased mast stability
- Work lights illuminate crow's nest & ground for worker safety
- Jacks & levels help ensure mast is plumb
- Roomy crow's nest platform is free of obstructions
- Tandem axles & dual wheels - 8 tires on the road for stability

Faster/Cheaper Deployments than reg. COW

- 5 tool boxes & 4 storage compartments - maximize on-board storage
- On-board antenna and coax carrying systems reduce the need for secondary deployment vehicles
- Internal skeleton adapts to ever-changing equipment types and quantities
- Antenna mounts provide for two levels of antennas and a microwave dish
- Timers turn off lighting when not needed
