

Your OEM Repair Partner

Maverick Technologies Inc., with 15+ years of repair experience and OEM support, is your best option for a U.S.-based “test and repair” partner. Our engineers are equipped with the tools and expertise to meet your needs in a very cost-effective manner.

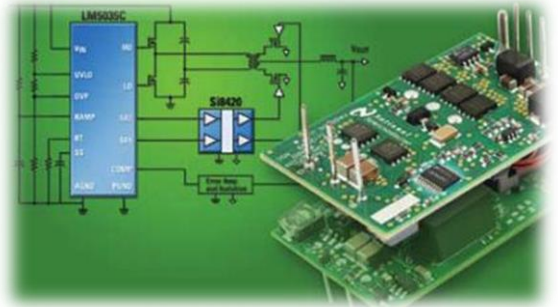

We are “Repair Experts” – superior to CM’s

- Repairing electronic items is all we do – repair is not a secondary or inconvenient activity
- We repair at the component level, not merely replace assemblies
- We are experienced in providing support to major OEMs
- We are a cost-effective U.S.-based partner for you
- Expert repairs performed by qualified engineers & technicians

Maverick supports OEM’s by providing:

- We track repairs by serial number and component replaced
- We accumulate detailed Failure Mode Analysis (FMA) data to support the OEM’s efforts to improve their products
- We provide standard and customized reports, and internet portal access to key repair data
- Maverick Repairs communicates opportunities to its clients & implements OEM Engineering Change Orders

Maverick Repair offers outstanding service:

- Lightning fast turn-around-times; often 5-10 business days, with expedites available
- Very low defective rates (historically under ½ %)
- State-of-the-art repair capabilities and budget saving pricing
- Custom designed Automated Test Equipment (ATEs)
- Specialists in networking, communications, and power equipment repairs; and more
- Repairing both current technologies and legacy designs
- Dedicated repair lines for your products
